Activity Priorities and Description

Program Key Priority Area *

Aged Care

Other Program Key Priority Area Description**Aim of Activity ***

The aim of this activity is to support senior Australians to live in the community for longer through the promotion of healthy ageing and support for the ongoing self-management of chronic disease.

Description of Activity *

Some older Australians are entering aged care earlier than they may otherwise need to due to a lack of support for healthy ageing or ability to manage their chronic conditions in the community.

The objectives of this activity are to:

- Support senior Australians to live in the community for longer (including those not currently receiving aged care services) through commissioning early intervention initiatives that promote healthy ageing, slow decline and support the ongoing management of chronic conditions
- Increase awareness in the primary health care workforce of the needs of the population and the availability of these initiatives.

Activity Consultation and Collaboration

Consultation

EMPHN has adopted the International Association for Public Participation (IAP2) framework to inform how consumers, clinicians, service providers, peak bodies and other interested parties can work together to inform PHN activities, including (but not limited to) commissioned services and other support activities. IAP2 methods legitimise differing levels of participation dependent on the goals, timeframes, resources and levels of concern in the decision to be made. At EMPHN consultation is the minimum threshold for engagement. This will occur via relevant committees, such as the Clinical Council and Consumer Advisory Committee, and through other groups and mechanisms as appropriate.

Collaboration

As noted, EMPHN has adopted the IAP2 framework to inform stakeholder participation. Wherever possible, EMPHN will attempt to work with consumers, clinicians and other stakeholders throughout more elaborate participation levels, such as involvement, collaboration and empowerment. EMPHN has mapped a range of workflows and processes that support bringing stakeholders into the processes of needs assessments, topic prioritisation, design, and evaluation planning. EMPHN consider that the shared construction and interpretation of complex health problems with stakeholders creates stronger and more effective interventions. Culturally informed consultation will be engaged to ensure that collaboration is culturally safe and trauma informed.

Activity Priorities and Description

Program Key Priority Area *

Aged Care

Other Program Key Priority Area Description**Aim of Activity ***

The aim of this activity is to improve timely access to primary health care professionals for residents in Residential Aged Care Facilities (RACF), particularly through improvement in access, capacity and capability to utilise telehealth facilities.

Description of Activity *

Timely access to primary health care professionals, whether through face-to-face consultation or telehealth, is recognised as an issue for many RACFs, that in some cases can lead to potentially preventable hospitalisations. RACFs require adequate telehealth facilities to support access to virtual consultations for their residents.

Activities include:

- Conducting an assessment of RACFs in the EMPHN region to understand their current engagement with telehealth and perceived barriers and enablers.
- Tiering of RACFs into high and low needs, based on a number of factors including socio-economic area, size etc.

- Delivery of a grants process (including proactive outreach) to upgrade RACF telehealth capabilities, particularly for the use of video conferencing.

- Collaboration with Victorian and Tasmania PHN Alliance (VTPHNA) to develop telehealth education. Each RACF engaging in the grant opportunity will need to put forward staff to engage in the training.

Additional exploration of other telehealth adoption and improvement opportunities will be explored, including secure messaging capabilities, shared medicines list and identification of RACF residences in GP data to inform more proactive GP support.

Activity Priorities and Description

Program Key Priority Area *

Aged Care

Other Program Key Priority Area Description**Aim of Activity ***

The aim of this activity will be to provide education and support to RACFs to develop their processes for managing the health of residents in the after-hours period in order to reduce clinically inappropriate transfer to hospital.

Description of Activity *

RACF residents can experience deterioration in their health during the after-hours period, but immediate transfer to hospital is not always clinically necessary or appropriate. Lack of awareness and utilisation of out of hours services provided by GPs and other health professionals leads residents to unnecessary hospital presentations.

EMPHN is developing an after-hours toolkit in collaboration with metro PHNs and key stakeholders. We will be working with RACFs in the region to implement the toolkit.

Activity Priorities and Description

Program Key Priority Area *

Aged Care

Other Program Key Priority Area Description**Aim of Activity ***

The aim of the activity is to establish and maintain a network of care finders that provide specialist and intensive assistance to help eligible patients understand and access aged care and other relevant supports in the community.

Description of Activity *

The aged care system is complex, and some people find it more difficult than others to navigate and access the services they need. Older people have noted that more localised and face-to-face support to help navigate and access aged care would be welcome. As a result, the Royal Commission into Aged Care Quality and Safety recommended a workforce of care finders be funded to provide face-to-face support to help people navigate and access aged care. As a result the care finder program was announced.

Activities include:

- Complete a health needs assessment that assists with understanding local needs in relation to care-finder support, including Care Finders that focus specifically on CALD and other specific community needs.
- Commission a network of care finders to provide specialist and intensive assistance to help eligible patients understand and access aged care and other relevant supports in the community.
- Work with providers to improve the quality of their services to best meet the needs of the community.
- Establish a local community of practice for the various Care Finder providers to work together and share learnings and

innovations.

- Work closely with VACCHO as they develop the TIF program to ensure cohesive future integration.
- Develop integration activities for General Practice and other key stakeholders such as hospitals, pharmacies and councils.
- Develop a service map for the EMPHN region
- Conduct local industry briefings for stakeholders who may refer to Care Finder.

Activity Consultation and Collaboration

Consultation

EMPHN has adopted the International Association for Public Participation (IAP2) framework to inform how consumers, clinicians, service providers, peak bodies and other interested parties can work together to inform PHN activities, including (but not limited to) commissioned services and other support activities. IAP2 methods legitimise differing levels of participation dependent on the goals, timeframes, resources and levels of concern in the decision to be made. At EMPHN consultation is the minimum threshold

for engagement. This will occur via relevant committees, such as the Clinical Council and Consumer Advisory Committee, and through other groups and mechanisms as appropriate.

Collaboration

As noted, EMPHN has adopted the IAP2 framework to inform stakeholder participation. Wherever possible, EMPHN will attempt to work with consumers, clinicians and other stakeholders throughout more elaborate participation levels, such as involvement, collaboration and empowerment. EMPHN has mapped a range of workflows and processes that support bringing stakeholders into the processes of needs assessments, topic prioritisation, design, and evaluation planning. EMPHN consider that the shared construction and interpretation of complex health problems with stakeholders creates stronger and more effective interventions. Culturally informed consultation will be engaged to ensure that collaboration is culturally safe and trauma informed.

Aged Care

Other Program Key Priority Area Description

Aim of Activity *

The aim of the activity is to contract ACH providers as care finders.

Description of Activity *

Care finder program: Transition of Assistance with Care and Housing Program

There was an amendment to the minimum amount of funding that EMPHN must quarantine to contract ACH providers as care finders from 1 January 2023 to 2024-25. On 6 May 2022, EMPHN was provided the minimum amount of funding that must be quarantined to contract ACH providers as care finders.

From the ACH providers previously listed, the Moonee Valley City Council has been removed as it is not in the Eastern Melbourne PHN region. There are five organisations funded to provide ACH services in EMPHN Region. The Planned Expenditure Section details the minimum amount of funding that EMPHN was required to quarantine to contract ACH providers as care finders from 1 January 2023 to 2024-25.
